Best Practice 1

1. Title of the Practice

Skill Development Training Program

2. Goal

- To provide a platform for inculcation of basic and advanced skills as per the requirements of the job market
- To promote entrepreneurial and employable attitude and skills among students
- To promote research activities related with skills
- To create social awareness and accountability
- To ensure women empowerment

4. The Practice

To make the program effective following steps were followed

• Identification of skill gaps and the required skill set for the students taking into consideration the stakeholders' feedback, local needs and the expectations from the industries.

• Preparation of Plan for Skill Development Programs.

• Planning the required human and physical resources.

• Announcement of the program and counseling the students about the importance of these skills for career as well as its use in day to day life.

• Seeking participation of students for the program.

• Making the infrastructure ready

• Organizing the program and giving wide publicity to all the students and faculty members.

• Follow up of the program

• Getting feedback from students, parents and employers

5. Evidence of success

• Awareness about self employment is created among the students.

• The students acquired the basic skills as a potential career option.

• Entrepreneurship attitude and culture is developed among the students.

• Research attitude (innovation) is also developed among the students.

• Students are well equipped with related entrepreneurship skills such as marketing, accounting,

communication, computer etc.

• Students demonstrated their skills through self employment and generated profit.

• Students are placed in various fields and earn a salary.

• Students used their skills in preparing the items for household purpose

• Students have undertaken research projects in various fields.

**6. Problems encountered and Resources Required**

Problems Encountered:

1. Most of the students acquired the skills, however they lack in commercialization.

2. Orthodox attitude of parents resulting in lack of support and early marriages of girl students

3. Research attitude among the students is not up to the mark

4. Schedule of examinations hampers their chances in job sustainability

Resources Required:

The resources required are met out as under

• Human Resource – Existing faculty, Inviting industry experts, employers, alumni, parents, MoUs with Industries and other institutes

• Infrastructural resources – Addition and update of existing infrastructure of the college and sharing of infrastructure with other industries and institutes (through MoUs) Financial resources

DEPARTMENT OF AERONAUTICAL ENGINEERING

Add–On Course- AO19001 Artificial Intelligence & Machine Learning
Academic Year: 2019-20

<u>Course Summary with Course Outcome</u>

Course Name	: **Artificial Intelligence & Machine Learning**
Course Duration	: **35 Hours**
Year offered	: **2nd Year Aeronautical Students**
Course Instructors	: **Mr. Pragadheswaran**
	Assistant Professor/ AO

Course outcome

Students could understand the basics of AI and machine learning. A follow up Hands-on training was given to them on designing was done in detail. Different systems associated with the vehicle were also studied.

Course type	: Self framed value added course

<u>Assessment Mode</u>

Attendance	: 35Hrs
Number of Participants	: 23
Scheme of exam	: Physical Answer sheet mode
Date of exam	: 26/10/2019

Add–On Course- AO19002 Workshop on UAV
Academic Year: 2019-20

Course Summary with Course Outcome

Course Name	: **Workshop on UAV**
Course Duration	: **35 Hours**
Year offered	: **1st Year Aeronautical Students**
Course Instructors	: **Mr. Prem Kishore**
	Assistant Professor/ AO

Course outcome

Students could understand the basic parts of a UAV and study their assembly. Hands-on training was given to them on assembly and flying was done in detail. Different systems associated with the vehicle were also studied.

Course type : Self framed value added course

Assessment Mode

Attendance : 35Hrs

Number of Participants : 42

Scheme of exam : Physical Answer sheet mode

Date of exam : 14/02/2020

Value Added Course Summary Report with Course Outcome 2019-2020

Course Name : Data Science(ECE19002)
Course Duration : 35 Hours
Year offered : 3rd Year ECE Students- 2021-2022
Course Instructors : Ms. Hima Vijayan V P
Assistant Professor/ ECE

Course outcome

Students would demonstrate proficiency with statistical analysis of data and develop the ability to build and assess data-based models. Students would execute statistical analysis with professional statistical software.

Course type : Self framed value added course
Assessment Mode
Attendance : 35 Hrs
Number of Participants : 20
Scheme of exam : Physical Answer sheet mode

Best Practice 2

1. Title of the Practice

　　　Academic Events

2. Goal

　　　The main objective of the practice is to motivate and evaluate students' interest in the individual subject. This makes a student to implement the concept practically which helps to enrich their knowledge in the subjects. The seminars will keep the students up-to-date with the technologies. They start thinking about new things which could be implemented practically. A role-playing scenario aims at introducing students to various perspectives or ways of thinking about a situation, enhancing their ability to overcome problems, and providing experience within a given context.

3. The Context

　　　Academic events are an excellent opportunity to involve students and to encourage them to connect their peers as they attempt to complete the task assigned to them in their particular position. Mold students for time management and teamwork, too. Employers favor recruiting applicants who are equipped with their industry experience and skills and know-how to connect and interact with clients. Also, if students choose to pursue higher studies abroad, co-curricular activities such as problem-solving, seminar, role play, etc., will make them stand out from other students. Involvement in these academic activities along with learning in the classroom teaches students how to efficiently manage time, prioritize assignments, obey a timetable and meet deadlines. Team exercises help students connect well with one other in the classroom.

4. The Practice

　　　In addition to the standard academic program, the institution is taking an extra step in having the students experts in the individual subject matter. So, apart from the assessment, we gave a realistic approach to all the topics. Technical Quiz Students need to form teams while participating in quizzes, allowing them to hone their teamwork skills. Technical seminars Making students take seminars on the subject topics would always help them to understand the subject. This would give them a chance to collect more information about the seminar topic they

are provided with. The result is that they would learn the subject well. Because they have to acquire knowledge about the subject of their own. By taking seminars in front of their teachers and friends, the students will be able to talk before a crowd later in their life without any difficulty. Also, they can improve their presentation skills. It is a great chance for the students to improve their skills within their curriculum. They can improve their language. By taking seminars they will become very able to interact with the people which will turn out to be useful in their later life. Brainstorming It Allows Creative Thinking, It Encourages Everyone's Viewpoints, It Involves Everybody, It's Swift and Easy, It Sets a Learning Baseline. Role play is an excellent tool for engaging students and allowing them to interact with their peers as they try to complete the task assigned to them in their specific role. This work can be done in cooperative groups and/or students can maintain the persona of their role throughout the class period. Students are more engaged as they try to respond to the material from the perspective of their character. Role play will give children the skills to handle problematic social interactions, such as bullying, which may happen as they progress through life. Design and Simulation/ Hardware Implementation Modeling and simulation are emerging as an increasingly important tool for education and training. Students can apply previously learned concepts and theories to practical situations solving real designing problems. It helps students see complex relationships that would otherwise involve expensive equipment or dangerous experiments. It provides students with new methods of problem-solving. Allows for math, science, and technical skills to be taught in an applied, integrated manner. Provides realistic training and skills for a multitude of career areas. It is used extensively in industries. Problem-solving The problems link concepts, incorporate specifics in a scaffolded way and implement additional knowledge until the students have a clear understanding and meaning. The focus of this approach is on the students solving problems with the faculty present in collaboration.

5. Evidence of Success

Based on their success in the competitions, prizes and marks are won. In their creative projects, students demonstrated their problem-solving skills. Students took part in various competitions at different levels .

6. Problems Encountered and Resources

Required Successful implementation at levels of students is a challenge. Time constraint plays a vital role in conducting events within a stipulated period. One of the biggest challenges of the role-playing technique is to get all students to participate and be truly engaged.

REPORT

24/09/18

Name of the Event : Free food donation activity at Medical College
Program Duration : 1 Day
Program Type : Outreach
Program Coordinator : Mr. Shaji C (ME Lab Instructor)

A free food donation activity was planned at Medical College on 29th September 2018. Students brought food items from their home to help the needy. By 10 am, the food items brought by the students were collected in the central portico. By 11 am, these food items were taken to Medical College and many bystanders of admitted patients as well as many poor people got benefited by this noble act by the NSS volunteers of ACE College of Engineering.

REPORT

28/09/18

Name of the Workshop	: tree sapling distribution
Program Duration	: 1 Day
Program Type	: Outreach
Program Coordinator	: Mr. Shaji C (ME Lab Instructor)

About 100 tree saplings were distributed in the adopted village on 28/09/2018 by the NSS volunteers of ACE College of Engineering. Those who were passing by this distribution activity were also given tree saplings. This noble act of the NSS volunteers created an awareness among the people of the adopted village on the importance of protecting nature and growing more trees for the future generations.

REPORT

17/05/19

Name of the Event	: Free food donation activity at SAT Hospital, Trivandrum
Program Duration	: 1 Day
Program Type	: Outreach
Program Coordinator	: Mr. Shaji C (ME Lab Instructor)

A free food donation activity was planned at SAT Hospital,Trivandrum on 17th May 2018. Students brought food items from their home to help the needy. By 10 am, the food items brought by the students were collected in the central portico. By 11 am, these food items were taken to SAT Hospital and many bystanders of admitted patients as well as many poor people got benefited by this noble act by the NSS volunteers of ACE College of Engineering.

18/12/18

Name of the Event   : **Blood Donation Camp**
Program Duration   : **1 Day**
Program Type   : **Outreach**
Program Coordinator   : **Mr. Shaji C (ME Lab Instructor)**

A free Blood Donation Camp was conducted at Kalliyoor Grama Panchayath on 18th December 2018. Blood Donation Camp was carried out in a mobile blood donation unit, and an awareness was given to the people of Kalliyoor regarding the common myths and benefits of blood donation. Students from ACE as well as people from outside donated blood during this blood donation camp.
